INTERNSHIP EXPERIENCE

Tencent	<i>Business Analysis Intern</i>	<i>Dec 2025 - May 2026</i>
• AI Agent Product Development: Built a negotiation-briefing Agent using CodeBuddy and related platforms to improve drafting efficiency. Developed front-end/back-end prototypes with Claude Opus and GPT; adopted Agent Loop and Function Calling architecture with a locally deployed GLM for knowledge retrieval, content drafting, and quality scoring. Packaged core capabilities as reusable Skills and MCP tools for cross-platform deployment. • FinTech Trend Research and Market Assessment: Conducted in-depth research on the Agent Payments landscape, concluding that overseas payment infrastructure for AI agents is beginning to take shape. In China, agent-based payment use cases are currently limited to tech-savvy users, such as token top-ups and MCP tool payments, while mass-market consumer adoption remains to be validated. Tracked leading payment companies' developments in AI, stablecoins, BNPL, and cross-border payments, producing 10+ research reports to support business decisions and management reporting.		
Huaan Securities Co., Ltd.	<i>Power & New Energy Research Intern</i>	<i>Jul 2024 - Sep 2024</i>
• Financial Analysis and Earnings Forecasting: Used iFind and Wind to break down core business performance of 11 listed companies (net profit, ROE, gross margin); established three-year growth forecast frameworks. • Equity Research Reports: Integrated financial data, industry developments, and policy events to write 3 weekly reports on wind/solar sectors and 12 company deep-dive reports; visualized key data via line-trend comparisons and geographic heat maps. • Research Database and Policy Analysis: Collected provincial peak/off-peak electricity tariffs over three years to model future price trends for earnings forecasts. Compiled national power-distribution policies from the past decade; analyzed policy changes through strengthened requirements and delivered 3 policy interpretation reports.		
Frost & Sullivan	<i>Healthcare Project Intern</i>	<i>Oct 2023 - Jan 2024</i>
• IPO Report Development: Drafted market analysis and competitive landscape chapters (~30% of data analysis) using WHO global vaccine database and company clinical-trial data. • Vaccine Database Development: Consolidated multi-category vaccine data in Excel into a database of 5,000+ records covering pricing sensitivity, brand awareness, vaccination-channel preferences across China, Southeast Asia, and global markets. • Report Structure and Quality Enhancement: Improved report structure and logic across market size, industry value chain, and company strengths dimensions. Conducted data verification, logic refinement, and language polishing; completed revisions to dozens of reports, most presented in English.		

ADDITIONAL INFORMATION

- **AI Agent Development:** Proficient in Skill-based workflow orchestration, MCP tool encapsulation, multi-model invocation (Claude / GPT / GLM), large-language-model applications, and agent platforms including WorkBuddy, Claude Code, Codex, Cursor, and Coze.
- **Financial Analysis & Tools:** Skilled in financial data terminals (Wind, iFind, WarrenQ); experienced in investment analysis, industry and company research
- **Computer Skills:** Proficient in Python and data analysis; advanced user of Microsoft Office Suite
- **Character Traits & Hobbies:** Outgoing and energetic; Football & Fitness
